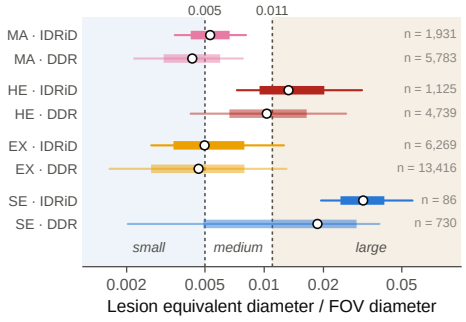
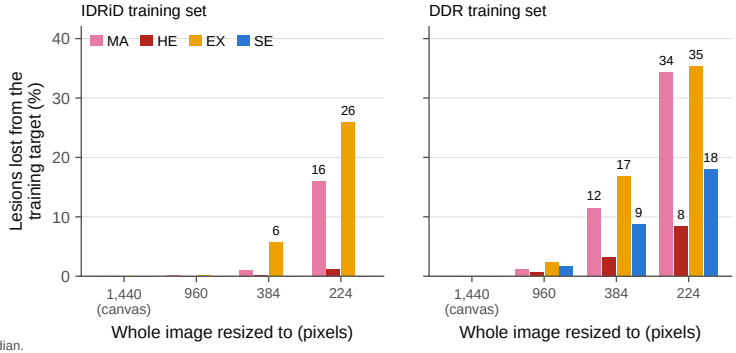
a **Lesion size by class**



Training images only (IDRiD 44, DDR 383). Bar, quartiles; line, 10th–90th percentile; dot, median.

b **Lesions that vanish when the image is shrunk**



c **Lesion-level recall by size**

	Trained on IDRiD (recall by lesion size)				Trained on DDR (recall by lesion size)

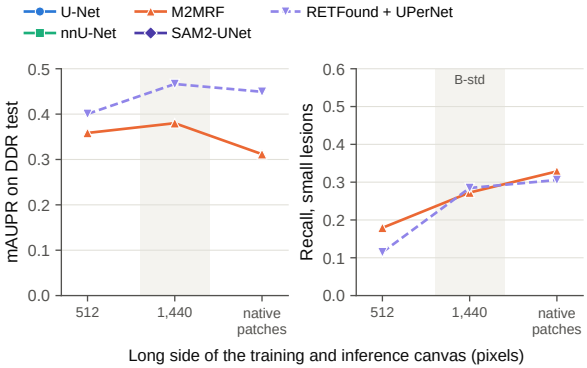
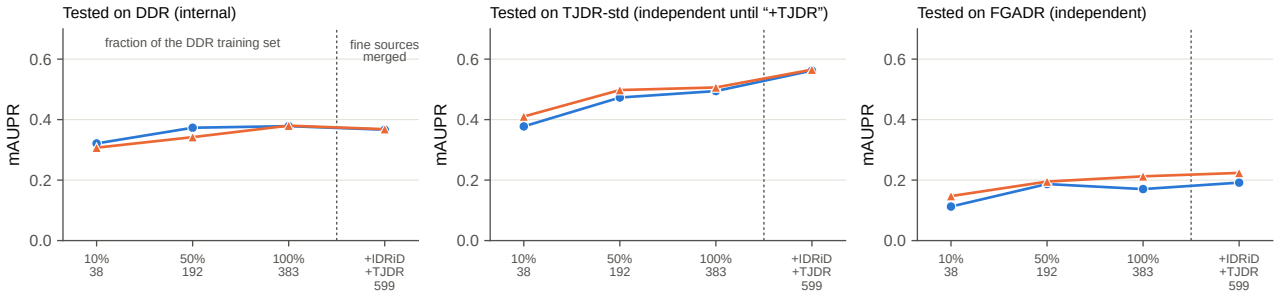
d **Input resolution**



e **Training amount and merged sources**



Second line: number of training images. Every setting uses the same number of image passes; U-Net and M2MRF, seed 0.
